List of Local TV channels available on Freeview DTT

As at 04 April 2014

In June 2013, Ofcom started the second phase of local TV licensing by inviting applications to run local TV services in seven local areas. In October 2013, Ofcom awarded L-DTPS licenses for the following but technical parameters have yet to be confirmed:

Area served by *L-DTPS	Operator	Mux ID	Freeview LCN	Transmitter	Antenna height (metres above ground level)	UHF Channel	Polarity	ERP (kW)	Live from
Cambridge	Cambridge Presents	TBC	8						2014-15
Reaching approximately 83000 homes across Cambridge									
Scarborough	Yorkshire Coast TV	TBC	8						2014-15
Serving around 31,000 homes in the Scarborough area									

Ofcom will also be considering applications for local TV licences in Middlesbrough, Mold, Swansea and York in the coming months.

They have rejected the application for local TV in Bangor. The operator offered the potential to reach 16,000 homes and Ofcom's Broadcast Licensing Committee viewed that the applicant would not be able to maintain the proposed service over the licence period and therefore decided not to award the licence.
